WE ARE A TEAM

OVER 150 PEOPLE CREATE ONE LARGE, PULSATING ORGANISM, WHERE EACH OF US CONTRIBUTES OUR PART, UNIQUENESS, AND OUR EFFORT TOWARD ITS GROWTH. EVERY DAY, WE SHOW MUTUAL SUPPORT, RESPECT, AND A WILLINGNESS TO LISTEN. IT'S NOT ALWAYS EASY, ALMOST ALWAYS IT'S A CHALLENGE. AND YET, DESPITE OCCASIONAL OBSTACLES ON THE PATH TO SUCCESS, WE ARE ONE FAMILY.

WE ARE RMF INVEST.

ABOUT US

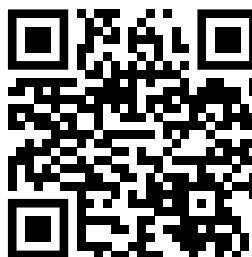

RMF Invest is a Czech family-owned company overseeing businesses primarily in the waste management sector. We specialize in waste collection, recycling, and disposal, providing efficient and sustainable solutions for environmental protection not only at the local level but also offering waste management services. We have been operating in the market since 2000 and have extensive experience in this field. Based on these experiences, we can offer comprehensive services within one group.

We strategically reinvest part of our profit into the development of modern technologies, enabling us to provide the highest quality services in our industry to customers and business partners across the Czech Republic.

YOUR PARTNER IN WASTE DISPOSAL

SBĚRNÉ[®]
SUROVINY UH

A family-owned company following tradition since 1971, it focuses on comprehensive services in waste management. We provide waste disposal and recycling services for our customers, as well as the removal of a wide range of waste types. We operate sorting lines, crushers, presses, and technologies for waste sorting and treatment.

www.sbernesurovinyuh.cz

COMMODITIES

- Steel scrap, Non-ferrous metal
- Textile
- Hazardous waste
- Municipal waste/Organic waste
- Polystyrene
- Tyres
- Wood
- Electronic waste
- Paper/Plastic/Glass

ENVIRONMENTAL CONSULTING

We provide environmental consulting in the area of waste disposal, including hazardous waste not only for the Zlín region but also for the entire Czech Republic. We also offer training in the environmental area, legal regulation registration, and risk assessment for environmental damage.

We offer professional consulting and contractual supervision at our clients' premises, with an emphasis on ensuring the actual situation and developing proposals for the environmental area. Additionally, we specialize in creating, launching, and overseeing waste management systems for our clients. As part of our environmental consulting services, we guarantee the creation of internal documentation for various environmental areas in compliance with

current Czech legislation, conducting operational inspections, and providing reports on identified deficiencies. We also handle updates and adjustments to documentation and internal guidelines (waste, water protection and management, air protection, and chemicals).

TRANSPORT

We offer the transportation of goods, materials, waste, and raw materials throughout the Czech Republic. Various types of vehicles and containers can be used.

- Flatbed Trucks
- Trucks with Hydraulic Tail Lifts
- Trailers
- Garbage Trucks
- Hydraulic Arm Truck
- Containers (capacities from 1 m³ to 40 m³)

TYPES OF CONTAINERS

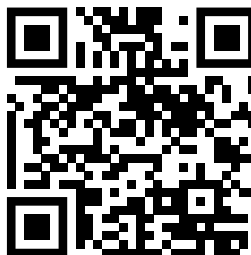

We offer a wide range of containers, boxes, and handling bins suitable for storing and sorting various types of waste, including hazardous waste.

- Eco-friendly containers with double bottoms
- Containers for hazardous waste
- Bins for car batteries

WHERE TO DISPOSE OF WASTE IN PRAGUE?

ROTTAMI ODPADY

We are proud that our headquarters in Prague can effectively serve construction companies, manufacturing plants, demolition companies, property management firms, service companies, and any other business that wants to participate in recycling and contribute to a more sustainable future.

www.svozodpadu.cz

WASTE THAT BECOMES ENERGY

The company Ekotermex, a.s. was founded between 1991 and 1992 and aims to ensure the disposal of hazardous waste and thus the protection of the environment. The company's headquarters can be found in Pustiměř near Vyškov.

www.ekotermex.cz

The company is divided into:

- Facilities intended for waste collection, recycling, gathering, storage, and subsequent disposal of industrial waste
- Incinerator - a facility for the disposal/ utilization of waste

We are capable of providing comprehensive services, including legal obligations, waste production records, and consulting in waste management.

INCINERATOR

Waste is accepted at the incinerator by citizens, a common person with a business license, and legal person.

Our facility is designed for the collection, recycling, gathering, storage, and subsequent disposal of hazardous medical and industrial waste through incineration. The technological equipment is capable of incinerating both solid and liquid industrial waste. Waste that cannot be disposed of through incineration is further transferred for utilization or disposal by authorized entities based on contracts.

TRANSPORT

Operation of own road transport with ADR:

- Truck up to 3,5 tons

- Flatbed Trucks up to 7.5 tons
- Flatbed Trucks up to 12 tons
- Hydraulic Arm Truck up to 12 tons, with the option of a trailer
- Hydraulic Arm Truck up to 26 tons, with the option of a trailer
- Tipper Truck up to 36 tons
- Tipper Truck up to 36 tons with trailer walkingfloor
- Tipper Truck up to 39 tons

SHREDDING

Destruction of sensitive information according to the strictest standards, which is then processed in an environmentally friendly manner, whether in the form of paper documents or data carriers.

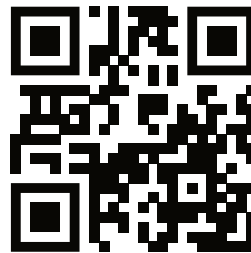

Most frequently shredded documents:

- Accounting and medical records
- Archival documents
- Credit cards
- IDs
- CDs / DVDs

A NEW LIFE FOR PAPER AND PLASTIC

A company based in the Příbram district that provides waste management services. We primarily focus on recycling all types of paper and plastics from municipalities, cities, and other entities. The facility is equipped with a weighbridge system with visible weight monitoring and modern collection and handling equipment.

www.zmpb.cz

PAPER

By recycling paper, we minimize the amount of waste, reduce the need for timber harvesting, and save energy, which contributes to sustainability and environmental protection.

We recycling:

- Printed materials (newspapers/ magazines/flyers)
- Cardboard
- Mixed paper
- Printer's trims

PLASTIC

Plastic recycling holds an essential role in the fight against pollution, which is why used plastics are collected, sorted, cleaned, and transformed into raw materials that can be reused.

We collect:

- PET bottles
- Clear and colored films
- Polystyrene
- PC, PS, PP, PVC, PA, PE, HDPE

COLLECTION YARD

The collection yard at the Háje plant is primarily intended for inhabitants of the Přeboram area.

It is possible to dispose of municipal and bulky waste, sorted materials (paper/ plastic/glass), sell scrap metal and non-ferrous metals. The facility also offers tire take-back services.

REGRANULATION LINE

We operate waste regranulation for the further use of LDPE, HDPE, ABS, PMMA, SAN, PC, PS, PA, and PP. The collection of products is ensured both in the Czech Republic and abroad.

We also operate shredders for waste materials such as HDPE, PA, ABS, PMMA, and PP, producing shreds for sale.

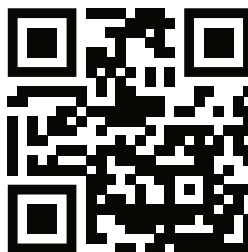

MOBILE SORTING LINE

The projected annual capacity of the mobile sorting line is 2,499 tons. The projected daily processing capacity of the facility is 100 tons. The maximum instantaneous capacity of the unit is up to 1,000 tons, depending on the sorted material. Our modern mobile sorting line is primarily used for sorting municipal plastic, but it can also sort other materials if necessary.

WE WILL TAKE CARE OF ALL
THE PAPER PROCESSING FOR YOU

Our aim is to ensure the supply of collected paper to direct buyers for recycling at competitive prices that meet the requirements of our customers. We facilitate the purchase of paper from both inhabitants and commercial entities.

www.pfre.cz

COLLECTION OF COMMODITIES

It mainly concerns:

- Old newspapers, magazines
- Cardboard, mixed paper
- Office paper, shredded paper
- Laminated paper
- Waste paper from packaging and printers

WE ARE LIQUIDATING

Collection and disposal of hazardous waste:

- Electronic waste, electronic scrap
- Metal waste
- Tyres
- Liquid waste
- Plastic waste
- Glass
- Wood
- Other services

PR TRANS s.r.o. specializes in domestic and international freight transport and forwarding. It was established in 2024 and is based in Pustiměř near Vyškov.

www.prtrans.cz

LOGISTICS

It primarily focuses on domestic and international freight transport and forwarding.

TRANSPORT

- Road transport of sea containers
- Road transport of trailers with sliding floors (walkingfloor)

WASTE MANAGEMENT RECYCLING CENTER

SVZ
ODPADOVÉ CENTRUM

Our company, SVZ CENTRUM s.r.o., provides comprehensive waste management services in the Příbram region. We operate a municipal waste landfill TKO Bytíz, a composting facility, a recycling plant for construction and other waste, and a collection yard.

www.svzcentrum.cz

OUR SERVICES:

- Handling of municipal, bulky, construction, and hazardous waste (including asbestos)
- Processing of biodegradable waste
- Production and sale of compost and recycled materials
- Sorting and sale of soil
- ADR transport and container transport
- Disposal of wastewater and grease traps

Our aim is to contribute to sustainable waste management and minimize its impact on the environment. With us, you will gain a reliable partner for effective and eco-friendly waste management solutions.

COMPREHENSIVE ENVIRONMENTAL AUDITS AND CONSULTING

GREEN HELP s.r.o. is a new member of the RMF Invest Group. The company is engaged in consulting activities, especially in the field of corporate environmental management. Thanks to our extensive experience in waste management, as well as in other environmental areas, we offer comprehensive consulting services, project development, and legal advice.

www.grhe.cz

COMPREHENSIVE ENVIRONMENTAL AUDITS AND CONSULTING

- **Do you know which environmental legislative obligations apply to your activities?**
- **How can you maintain environmental standards in your company and avoid disputes with authorities?**
- **How can you avoid heavy fines that could cause serious financial damage to your business?**
- **How can you improve the environmental efficiency of your portfolio?**
- **Do you have a specific environmental issue and don't know how to resolve it?**
- **Are you unsure whether you are meeting all your reporting obligations?**

At **GREEN HELP**, we provide a comprehensive assessment of your company's environmental impact in accordance with current environmental standards. We conduct environmental audits and offer ongoing support in the form of expert environmental consulting.

We understand that corporate environmental management is a broad and complex field. It includes areas such as waste management, air protection, integrated pollution prevention, water protection and use, and a number of other sub-sectors. Our environmental consulting services help you not only navigate the complex landscape of environmental legislation but also prepare for the challenges and changes it may require. We ensure that you are able to meet even the most demanding regulatory requirements.

We also identify hidden risks and potential pitfalls in your portfolio of activities that could threaten the ecological and financial stability of your company. Our aim is to give you peace of mind—knowing that your business operates in full compliance with the latest environmental standards and best practices.

Football started being played in the Prague district of Žižkov in 1897. The first clubs and teams began to organize around 1900. The first club named Viktoria was founded at that time, but soon ceased to exist. A club with the same name was then revived in 1903 by members of the Czech Sokol Association, Karel Pittl, Josef Friedl, and Rudolf Bus. Over 300 children are actively involved in training in the youth section.

www.fkvz.cz

HISTORY OF THE CLUB

Viktoria's most famous season came in 1928, when they won the football league ahead of Slavia and Sparta. Three years after this triumph, a novel by a great Viktoria fan, Karel Poláček, was published – Men in Offside. And just as a side note, the red-and-white striped Žižkov jersey is, after Slavia's, the second oldest still used jersey, not only in football but in sports in general. The war years meant the loss of 14 club members for Viktoria, who fell on the front lines, and the war also contributed to the deplorable condition of the football field Na Ohradě.

In 1925, Viktoria Žižkov was one of the founding teams of the top domestic professional football league, and in its first match, it drew 4:4 with SK Libeň. After turning professional, Viktoria once again ranked among the top three Prague football clubs. Efforts to build a new football field on the hill Vítkov ended in failure, even though it would have been an ideal solution. In the end, a plot of land was rented in Staré Strašnice – Na Třebešíně, exactly where today the track cyclists' tires race. In the early 1930s, Viktoria went through a period of setbacks, culminating in their first relegation from the First League after the sudden death of team

captain Karel Steiner. Their return to the top flight was achieved two years later, and this history repeated itself in the wartime year of 1941. Although Viktoria's team returned to the best football clubs, they never played as dominant a role again as they did in the first 25 years of their existence. The final chapter of their top-flight career during the glorious era of Viktoria came with their third relegation from the highest football league in 1947. Since then, the club played in lower football divisions until 1993.

GREATEST ACHIEVEMENTS

1x league title (1928)
2x cup winner (1994, 2001)

REFERENCE

Dopravní podnik
hlavního města Prahy

Our group offers **TURNKEY DEMOLITION AND DISPOSAL** services, and we have been involved in projects such as:

- Removal and disposal of hazardous waste from Ruzyně Airport
- Dismantling and welding work in the Prague subway, disposal of escalators including the entire technological unit
- Disposal of one of the last gas holders in the Czech Republic
- Demolition of high-voltage power poles over a 40 km stretch
